GUJARAT TECHNOLOGICAL UNIVERSITY

| | | BE - SEMESTER-IV (NEW) EXAMINATION – WINTER 2023 | |
|------------|------------|--|----------|
| | Sub | oject Code:3140609 Date:19-01-2024 | |
| | Sub | oject Name: Civil Engineering - Societal & Global Impact | |
| | Tin | ne: 10:30 AM TO 01:00 PM Total Marks:70 | |
| | Inst | ructions: | |
| | | 1. Attempt all questions. | |
| | | Make suitable assumptions wherever necessary. Figures to the right indicate full marks. | |
| | | 4. Simple and non-programmable scientific calculators are allowed. | |
| | | | |
| Q.1 | (a) | What are the impacts of global warming on ecosystems and society. | 03 |
| | (b) | What are the key differences between the first and second industrial revolutions, and how | 04 |
| | (c) | did they impact the field of civil engineering? What are the key components of the future vision for Civil Engineering, and how do they | 07 |
| | (c) | address the evolving needs and challenges of our world? | 0 / |
| | | address the everying needs and chancinges of our world. | |
| Q.2 | (a) | Explain the concept of smart cities & their role in the future of urban development. | 03 |
| | (b) | Explain the critical role of water provisioning infrastructure in addressing water scarcity | 04 |
| | | challenges | |
| | (c) | Discuss the various sources of renewable energy for power generation. OR | 07 |
| | (c) | Explore the role of green infrastructure in sustainable urban development | 07 |
| | (-) | | |
| Q.3 | (a) | Discuss the economic and social contributions of civil engineering to GDP, employment, | 03 |
| | (1.) | product quality, and stakeholder safety. | 0.4 |
| | (b) | What is Lean Construction, and how does it improve the quality and sustainability of civil engineering projects? | 04 |
| | (c) | Evaluate the potential advantages and challenges of implementing futuristic | 07 |
| | (-) | transportation systems like the Hyperloop. | |
| | | OR | |
| Q.3 | (a) | Name one advanced construction technique that enhances sustainability and explain its | 03 |
| | (b) | benefits. | 04 |
| | (b) (c) | How can civil engineering projects reduce greenhouse gas emissions? Discuss the futuristic visions for infrastructure development and how they align with | 07 |
| | (c) | sustainability goals | 07 |
| | | | |
| Q.4 | (a) | Name three common sources of atmospheric pollution and briefly explain their impacts | 03 |
| | (1.) | on air quality. | 0.4 |
| | (b) | Explain two methods commonly used for the disposal of solid waste Write short note on: EIA | 04 07 |
| | (c) | OR | U / |
| Q.4 | (a) | Describe the role of water purification in ensuring access to safe drinking water. | 03 |
| | (b) | Discuss the importance of real-time environmental monitoring systems. | 04 |
| | (c) | Explain the greenhouse effect and its role in global warming, and mention one mitigation | 07 |
| | | measure to reduce greenhouse gas emissions. | |
| Q.5 | (a) | Explain the significance of climate control in indoor environments | 03 |
| 2.5 | (a) (b) | Discuss the role of recycling in reducing waste and promoting sustainability within built | 03 |
| | (0) | environments. | U# |
| | (c) | Define smart buildings and discuss their potential impact on sustainability, energy | 07 |

efficiency, and occupant comfort.

07

How can energy-efficient features in buildings contribute to sustainability? Q.5 03 Describe the LEED rating system and its importance in evaluating the sustainability of 04 (b) built environments. Discuss the challenges and methodologies involved in the conservation, repair, and (c) 07 rehabilitation of heritage structures. *****
