GUJARAT TECHNOLOGICAL UNIVERSITY

BE - SEMESTER-V (NEW) EXAMINATION – WINTER 2021

Subject Code:3150004

Date:14/12/2021

Subject Name:Contributor Personality Development Program

Time:02:30 PM TO 05:00 PM

Total Marks: 70

Instructions:

1. Attempt all questions.
2. Figures to the right indicate full marks.
3. Simple and non-programmable scientific calculators are allowed.
4. There are 29 questions (in 4 sections) in this question paper.

Section A

Instructions: This section has a scenario. Read carefully before answering the subsequent questions. There are 4 questions in this section. All questions are compulsory. Each question has 3 or 2 options. Choose ONLY ONE option which you consider the most appropriate and mark it on the answer sheet given to you.

Marks: 10

In 2019, Maria decided to sell coconut-shell based products as she noticed that coconut shells were being thrown away even though they could be used for other purposes. Earlier they were used as utensils but now they don't find much value in our houses.

Initially, she did not want to put in a large investment in purchasing machinery. This is when her father stepped in to help. Being a retired mechanical engineer, he made a low-cost version of the machine while Maria spent this time reaching out to businesses who were willing to buy bowls made of coconut shells from her. After identifying a few businesses, Maria made a few bowls and printed business logos on them. When the orders were delivered, she received positive feedback. Once Maria started receiving more orders, she struggled to make them by herself. So, she reached out to artisans and explained about the products. With their help, Maria was able to take on more orders and expand the range of available products.

1. If Maria sees this as a success event, when would she feel successful?
 - a] When customers are willing to pay a higher price for her sustainable products.
 - b] When consumers choose to buy sustainable products like what she is making for their daily use.
2. Maria's father made the machinery with local products for her business venture. Does that make Maria a 'creator of her destiny'?
 - a] No. It was her father who invented the machine from local products and found an answer when no one else could.
 - b] Yes. She was able to take her father's help to do what she wanted to do.

- c] Yes. Once she had an idea, she didn't let any constraints or obstacles stop her from converting that into reality.
3. By making the utensils at home, Maria learnt many things. What was her “success root”?
- Maria learnt how to save money on production.
 - Maria learnt how to make and sell the products & set up a business.
4. As a Contributor, which way will help Maria expand her business the most?
- Apart from selling online, she can also look for corporate companies, hospitality businesses and organizations that could use her products.
 - She could reach out to collaborate with other environment-friendly businesses to encourage people to stop using plastic and move to environment-friendly products.
 - She could attend exhibitions, fairs, and festivals, sell her products, and reach out to more clients.

Section B

Instructions: There are 10 questions in this section. All questions are compulsory. Each question has 2 statements. Select ONLY ONE statement that you feel is closest to your thinking and mark it on the answer sheet given to you.
