Q.5 It originated in the early 1990s, lasted about a decade and burst in 2000s. corporate application of IT multifold around the globe, creating strong demand for hardware and software. Aided by WWW, windows operating system and internet explorer, there was a real revolution. Many IT companies and internet oriented dotcom companies entered stock market through IPO. Most of the companies got huge success. The dow jones index, NASDAQ reached its peak in 2000. in this period almost all indices scaled new heights. By the autumn of 2001, stock indices returned to their 1998 levels. A number of factors contributed to the sudden collapse of the IT and communication shares like coverage provided by the media about creative accounting of such companies, antitrust case against IT giant, investors sentiments etc. In addition, March 2000 the Federal Reserve board hiked the base rate by 25% points from 6%. This month witnessed continuous fall in NASDAQ. Some of the reasons for market rise and falls are market deficiencies, deficiencies in government policies, less than expected profit and some of the scams and scandals involving the companies. The scandals resulted in loss of trust in the market. Whatever be the reason of the bubble burst, the ultimate result is the deterioration of investor confidence.

- (a)** Analyze the various phases of Bubble. **07**
- (b)** Evaluate the factors that resulted into the market crash. **07**

OR

- (a)** Classify the bubbles in the above case study. **07**
- (b)** Critically reason out the causes of bubble. **07**
