## GUJARAT TECHNOLOGICAL UNIVERSITY, AHMEDABAD, GUJARAT

#### **COURSE CURRICULUM**

## COURSE TITLE: ADVANCED DATABASE MANAGEMENT SYSTEM (Code: 3340701)

Course code: 3340701

| Diploma Programme in which this course is offered | Semester in which offered |  |  |
|---|---------------------------|--|--|
| Computer Engineering                              | 4th Semester              |  |  |

#### 1. RATIONALE:

This subject is associated with the designing of database for business, scientific and engineering application. By the end of this course the students will be able to write simple and advanced PL/SQL code blocks, use advanced features such as ref cursors and bulk fetches and database designing with normalization. Hence students will be able to design relational database which will help them in designing phase of projects in forthcoming semester.

#### 2. COMPETENCY:

The course should be taught and implemented with the aim to develop different types of skills so that students are able to acquire following competency:

• Design a relational database system with appropriate functionality to process the data and with constraints to maintain data integrity and avoid data redundancy.

#### 3. COURSE OUTCOMES

The theory should be taught and practical should be carried out in such a manner that students are able to acquire different learning out comes in cognitive, psychomotor and affective domain to demonstrate following course outcomes.

- i. Execute various advance SQL queries related to Transaction Processing & Locking using concept of Concurrency control.
- ii. Demonstrate use of Database Object.
- iii. Perform PL/SQL programming using concept of Cursor Management, Error Handling, Package and Triggers.
- iv. Understand Functional Dependency and Functional Decomposition.
- v. Apply various Normalization techniques.

#### 4. TEACHING AND EXAMINATION SCHEME

## 5. COURSE DETAILS

| Unit                     | Major Learning   | Topics and Sub-topics   |
|--------------------------|--|---|
|                          | Outcomes (in cognitive domain)   |   |
| Unit – I<br>Advanced     | 1a. Explain & practice Transaction Control and Data Control Language 1b. Explain types of Locks 1c. Test the locks on database                         | 1.1 Transactional Control:     Commit, Save point, Rollback 1.2 DCL Commands:     Grant and Revoke 1.3 Types of locks:     i. Row level locks     ii. Table level locks     iii. Shared lock     iv. Exclusive lock     v. Deadlock |
| SQL                      | 1d. Practice using various Database Objects  1e. Describe different  | 1.4 Synonym: Create synonym 1.5 Sequences: Create and alter sequences 1.6 Index: Unique and composite 1.7 Views:  |
|                          | types views and test it on a database  | Create/Replace, Update and alter views  |
|                          | 2a. Describe the fundamentals of the PL/SQL programming language 2b.Use different Control Structures 2c. Write and execute PL/SQL programs in SQL*Plus | 2.1 Basics of PL / SQL 2.2 Datatypes 2.3 Advantages  2.4 Control Structures: Conditional, Iterative, Sequential   |
| Unit– II<br>PL / SQL and | 2d. Explain & Implement Concepts of exception handling   | 2.5 Exceptions: Predefined Exceptions ,User defined exceptions  |
| Triggers                 | 2e. Implement procedure, function, cursor in Package   | 2.6 Cursors: Static (Implicit & Explicit), Dynamic 2.7 Procedures & Functions 2.8 Packages: Package specification, Package body, Advantages of package  |
|                          | 2f. Describe the various types of triggers 2g. Write, code, test and debug various types of triggers   | <ul> <li>2.9 Fundamentals of Database Triggers</li> <li>2.10 Creating Triggers</li> <li>2.11 Types of Triggers: Before, after for each row, for each statement</li> </ul>   |

| Unit              | Major Learning         | Topics and Sub-topics                            |  |  |  |  |  |  |
|-------------------|------------------------|--|--|--|--|--|--|--|
|                   | Outcomes               |  |  |  |  |  |  |  |
|                   | (in cognitive domain)  |  |  |  |  |  |  |  |
| Unit– III         | 3a. Describe           | 3.1 Basics of Functional Dependency              |  |  |  |  |  |  |
| <b>Functional</b> | Functional             | 3.2 Functional dependency diagram and examples   |  |  |  |  |  |  |
| Dependency        | Dependency             | examples 3.3 Full function dependency (FFD)      |  |  |  |  |  |  |
| and               | 3b. Solve problems of  | 3.3 Full function dependency (FFD)               |  |  |  |  |  |  |
| Decompositio      | functional             | 3.4 Armstrong's Axioms for functional            |  |  |  |  |  |  |
| n                 | dependencies           | dependencies                                     |  |  |  |  |  |  |
|                   |                        | 3.5 Redundant functional dependencies            |  |  |  |  |  |  |
|                   |                        | 3.6 Closures of a set of functional dependencies |  |  |  |  |  |  |
|                   | 3b. Describe and solve | J 1  |  |  |  |  |  |  |
|                   | problems using         | 3.8 Lossless join decomposition                  |  |  |  |  |  |  |
|                   | decomposition          | 3.9 Dependency-Preserving Decomposition          |  |  |  |  |  |  |
|                   | 4a. Describe different | ent 4.1 Basics of Normalization                  |  |  |  |  |  |  |
|                   | Normal Forms           | 4.2 Normal Forms                                 |  |  |  |  |  |  |
| Unit- IV          | 4b. Solve problems of  | i. First Normal Form (1NF)                       |  |  |  |  |  |  |
| Normalization     | normalization          | ii. Second Normal Form (2NF)                     |  |  |  |  |  |  |
|                   |                        | iii. Third Norma <mark>l Form</mark> (3NF)       |  |  |  |  |  |  |
|                   |                        |  |  |  |  |  |  |  |
|                   | 5a. Analyse various    | 5.1 Introduction to transaction concepts         |  |  |  |  |  |  |
| Unit- V           | concurrency control    | 5.2 Concurrency                                  |  |  |  |  |  |  |
| Transaction       | methods                | 5.3 Methods for Concurrency control              |  |  |  |  |  |  |
| Processing        |                        | i. Locking Methods                               |  |  |  |  |  |  |
|                   |                        | ii. Timestamp methods                            |  |  |  |  |  |  |
|                   |                        | iii. Optimistic methods                          |  |  |  |  |  |  |

## 6. SUGGESTED SPECIFICATION TABLE WITH HOURS & MARKS (THEORY)

| Unit<br>No. | Unit Title                              | Teaching<br>Hours | Distribution of Theory<br>Marks<br>(Duration – 42 Hours) |            |            |       |  |
|-------------|---|-------------------|--|------------|------------|-------|--|
|             |   |                   | R<br>Level   | U<br>Level | A<br>Level | Total |  |
| 1.          | Advanced SQL                            | 10                | 8  | 2          | 8          | 18    |  |
| 2.          | PL/SQL and Triggers                     | 10                | 8  | 4          | 10         | 22    |  |
| 3.          | Functional Dependency and Decomposition | 8                 | 4  | 4          | 2          | 10    |  |
| 4.          | Normalization                           | 8                 | 4  | 4          | 4          | 12    |  |
| 5.          | Transaction Processing                  | 6                 | 4 2 2 8  |            |            |       |  |
|             | Total                                   | 42                | 28   | 16         | 26         | 70    |  |

**Legends:** R = Remember; U = Understand; A = Apply and above levels (Bloom's revised taxonomy)

**Note:** This specification table shall be treated as a general guideline for students and teachers. The actual distribution of marks in the question paper may vary slightly from above table.

#### 7. SUGGESTED LIST OF EXERCISES/PRACTICAL

The practical/exercises should be properly designed and implemented with an attempt to develop different types of skills (outcomes in psychomotor and affective domain) so that students are able to acquire the competencies/programme outcomes. Following is the list of practical exercises for guidance.

Course code: 3340701

**Note**: Here only outcomes in psychomotor domain are listed as practical/exercises. However, if these practical/exercises are completed appropriately, they would also lead to development of certain outcomes in affective domain which would in turn lead to development of **Course Outcomes** related to affective domain. Thus over all development of **Programme Outcomes** (as given in a common list at the beginning of curriculum document for this programme) would be assured.

Faculty should refer to that common list and should ensure that students also acquire outcomes in affective domain which are required for overall achievement of Programme Outcomes/Course Outcomes.

| S. No.   | Unit | Practical/Exercises  | Hrs. |
|----------|------|--|------|
|          | No.  | (Outcomes in Psychomotor Domain)   |      |
| 1        | 1    | Perform queries for DCL Commands and Locks                                   | 4    |
| 2        | 1    | Implement authorization, authentication, privileges on database.             | 4    |
| 3        | 1    | Perform queries to Create synonyms, sequence and index                       | 4    |
| 4        | 1    | Perform queries to Create, alter and update views                            | 4    |
| 5        | 2    | Implement PL/SQL programmes using control structures                         | 6    |
| 6        | 2    | Implement PL/SQL programmes using Cursors                                    | 4    |
| 7        | 2    | Implement PL/SQL programmes using exception handling.                        | 4    |
| 8        | 2    | Implement user defined procedures and functions using PL/SQL blocks          | 6    |
| 9        | 2    | Perform various operations on packages.                                      | 4    |
| 10       | 2    | Implement various triggers   | 4    |
| 11       | 3    | Practice on functional dependencies  | 4    |
| 12       | 4    | Practice on Normalization – using any database perform various normal forms. | 4    |
| 13       | 5    | Practice on transaction processing   | 4    |
| Total Ho | ours |  | 56   |

#### 8. SUGGESTED LIST OF STUDENT ACTIVITIES

Following is the list of proposed student activities like:

- i. Prepare power point presentation for different database objects.
- ii. Prepare seminar on Functional dependency with examples of redundant functional dependency.
- iii. Prepare case study explaining the the need for converting a large table to many smaller tables using 1NF, 2NF, 3NF.
- iv. Design database which can be used in the course on .net programming
- v. The created procedures and functions in pl/sql packages should be used in ADO.net concepts of .net programming.

#### 9. SPECIAL INSTRUCTIONAL STRATEGIES (if any)

Concepts will be introduced in lectures and problem solving will be done through tutorials. Practical work will be through laboratory sessions. The course activities include: Formal Lecture: 30% Supervised Classroom Work: 30% Supervised Laboratory Experiences: 30% Unsupervised Directed Learning: 10%

Course code: 3340701

Group discussion of real life database design and normalization

#### 10. SUGGESTED LEARNING RESOURCES

#### (A) List of Books:

| Sr. | Title of Books              | Author        | Publication           |
|-----|-----------------------------|---------------|-----------------------|
| No. |                             |               |                       |
| 1   | Database Systems Concepts,  | Singh, S. K.  | Pearson               |
|     | design and Applications     |               | Education, New Delhi, |
|     |                             |               | 2012                  |
| 2   | Sql/ Pl/SQL                 | Bayross, Ivan | BPB                   |
| 3   | An Introduction to Database | Date, C. J.   | Pearson               |
|     | Systems                     |               | Education, New Delhi, |
|     |                             |               | 2012                  |
| 4   | Database System Concepts,   | Korth, Henry  | MGH                   |

#### (B) List of Major Equipment/Materials

- i. Computer System with latest configuration and memory
- ii. Multimedia Projector

#### (C) List of Software/Learning Websites

- i. Software: Oracle 10e/11g express edition
- ii. DBMS:http://nptel.iitm.ac.in/video.php?subjectId=106106093
- iii. SQL Plus Tutorial: http://holowczak.com/oracle-sqlplus-tutorial/
- iv. DatabaseTutorials:http://www.roseindia.net/programming-tutorial/Database-Tutorials
- v. Notes: http://service.felk.cvut.cz/courses/X36SQL//cviceni/plsql/pdf/
- vi. SQL Basic Concepts: http://www.w3schools.com/sql/
- vii. SOL Tutorial: http://beginner-sql-tutorial.com/sql.htm

#### 11. COURSE CURRICULUM DEVELOPMENT COMMITTEE

#### **Faculty Members from Polytechnics**

- **Prof. R. M. Shaikh**, H.O.D Computer Department, K. D. Polytechnic, Patan
- **Prof. K. N. Raval**, H.O.D Computer Department, R. C. Technical Institute, Ahmdeabad
- **Prof. J. J. Karagthala**, Lecturer Computer Engineering Department, GGP Ahmedabad
- **Prof. R. B. Pancholi**, Lecturer Computer Engineering Department, L. J. Ahmedabad

#### **Coordinator and Faculty Members from NITTTR Bhopal**

• **Dr. Shailendra Singh**, Professor & Head Dept. of Computer Engineering and Applications.

#### GUJARAT TECHNOLOGICAL UNIVERSITY, AHMEDABAD, GUJARAT

# COURSE CURRICULUM COURSE TITLE: COMPUTER NETWORKS (Code: 3340702)

| Diploma Programmes in which this course is offered | Semester in which offered |
|--|---------------------------|
| Computer Engineering                               | 4 <sup>th</sup> Semester  |

#### 1. RATIONALE

One of the major components of computer based information systems is computer networks. Through computer networks we can share hardware, Software, Processing, Data and Applications besides getting global connectivity for internet based communication and services.

For diploma students it is important to understand the function of computer networks and obtain requisite knowledge about hardware and software requirements of networks and acquire skills to establish a network using necessary hardware & software tools and configure various services over it. The objectives of this course are to make students learn the technology of establishing, commissioning (making operational) and maintaining computer networks.

#### 2. COMPETENCY

The course content should be taught and implemented with the aim to develop different types of skills so that students are able to acquire following competency:

Use Software and hardware technology to establish, Commission (make operational) and maintain computer networks.

#### 3. COURSE OUTCOMES

The theory should be taught and practical should be carried out in such a manner that students are able to acquire different learning out comes in cognitive, psychomotor and affective domain to demonstrate following course outcomes.

- i. Describe various protocols, models in networks.
- ii. Explain operations of TCP, HTTP, and DNS.
- iii. Illustrate use of Subnets, Ipv4 and Ipv6 in computer networks.
- iv. Design simple computer networks.
- v. Establish and Commission simple computer networks
- vi. Identify and solve network operational problems.

## 4. TEACHING AND EXAMINATION SCHEME

|               | connection                        | types of servers: File server, Pint       |  |  |
|               | 1 e. Explain use of various types | Server, Mail Server, Web Server,          |  |  |
|               | of servers.                       | Proxy Server                              |  |  |
|               | 0.                                |   |  |  |
| Unit – II     | 2 a. List all layers of OSI and   | 2.1 OSI model & function of each Layer    |  |  |
| The Reference | TCP/IP.                           | 2.2 TCP/ IP model                         |  |  |
| Model for     | 2 b. Explain functions of each    | 2.3 Connection oriented v/s               |  |  |
| network       | layer.                            | Connectionless approach                   |  |  |
| communication | 2 c. Differentiate between        | 2.4 Comparison of OSI & TCP/IP Models     |  |  |
|               | connection oriented and           |   |  |  |
| (A            | connectionless approach           |   |  |  |
|               | 2 d. Compare OSI and TCP/IP       |   |  |  |
|               | Model.                            |   |  |  |
| Unit – III    | 3 a. List guided and unguided     | 3.1 Types of Transmission Media           |  |  |
| Transmission  | transmission media.               | 3.2 Guided Media: Twisted Pair, Coaxial   |  |  |
| Media         | 3 b. Select appropriate           | Cable, Fiber                              |  |  |
|               | transmission media for a          | 3.3 Un Guided Media : Electromagnetic     |  |  |
|               | given network.                    | spectrum, Radio Transmission,             |  |  |
|               |                                   | MicrowaveTransmission,                    |  |  |
|               |                                   | InfraredTransmission,                     |  |  |
|               |                                   | SatelliteCommunication                    |  |  |

| Unit            | Major Learning Outcomes             | Topics and Sub-topics                 |  |  |
|-----------------|-------------------------------------|---------------------------------------|--|--|
|                 | (in cognitive domain)               |                                       |  |  |
|                 |                                     |                                       |  |  |
| Unit IV         | 4 a. Explain use of various         | 4.1 Repeaters                         |  |  |
| Network devices | Network devices.                    | 4.2 Hubs                              |  |  |
|                 | 4 b. Differentiate Layer 2 and      | 4.3 Switches                          |  |  |
|                 | Layer 3 Switches.                   | 4.4 Routers                           |  |  |
|                 | 4 c. State the use of Network       | 4.5 Access Points                     |  |  |
|                 | Management Software.                | 4.6 Gateways                          |  |  |
|                 |                                     | 4.7 Bridges                           |  |  |
|                 |                                     | 4.8 Difference between Layer 2 and    |  |  |
|                 |                                     | Layer 3 Switches.                     |  |  |
|                 |                                     | 4.9 Introduction of Network Managemen |  |  |
|                 |                                     | software                              |  |  |
| Unit V          | 5 a. Explain IP v4 and IP v6        | 5.1 IP Protocol – IP v4, IP v6.       |  |  |
| IP Protocol     | protocol.                           | 5.2 Addressing Schemes                |  |  |
| and Network     | 5 b. Select appropriate class for   | 5.3 Subnet & masking                  |  |  |
| Applications    | given network size.                 | 5.4 DNS                               |  |  |
| 11ppiicutions   | 5 c. Illustrate subnet and usage of | 5.5 Email                             |  |  |
|                 | subnet masking.                     | 5.6 FTP                               |  |  |
|                 | 5 d. Explain DNS, Email and         | 5.7 HTTP                              |  |  |
|                 | FTP, HTTP.                          |                                       |  |  |

#### 6. SUGGESTED SPECIFICATIONTABLE WITH HOURS&MARKS (THEORY)

| Unit | Unit Title                                    | Teaching | Distribution of Theory Marks |       |       |       |  |  |
|------|---|----------|------------------------------|-------|-------|-------|--|--|
| No.  |   | Hours    | R U                          |       | A     | Total |  |  |
|      | 6   |          | Level                        | Level | Level | Marks |  |  |
| I    | Basics of Computer Network                    | 8        | 5                            | 5     | 4     | 14    |  |  |
| II   | The Reference Model for network communication | 9        | 5                            | 5     | 4     | 14    |  |  |
| III  | Transmission Media                            | 8        | 4                            | 4     | 6     | 14    |  |  |
| IV   | Network devices                               | 8        | 4                            | 4     | 6     | 14    |  |  |
| V    | IP Protocol and Network Applications          | 9        | 3                            | 5     | 6     | 14    |  |  |
|      | Total   | 42       | 21                           | 23    | 26    | 70    |  |  |

**Legends:** R = Remembrance; U= Understanding; A= Application and above levels (Revised Bloom's taxonomy)

**Note:** This specification table shall be treated as a general guideline for students and teachers. The actual distribution of marks in the question paper may vary slightly from above table.

#### 7. SUGGESTED LIST OF EXERCISES/PRACTICALS

The practical/exercises should be properly designed and implemented with an attempt to develop different types of skills (**outcomes in psychomotor and affective domain**) so that students are able to acquire the competencies/programme outcomes. Following is the list of practical exercises for guidance.

Note: Here only outcomes in psychomotor domain are listed as practical/exercises. However, if these practical/exercises are completed appropriately, they would also lead to development of certain outcomes in affective domain which would in turn lead to development of Course Outcomes related to affective domain. Thus over all development of Programme Outcomes (as given in a common list at the beginning of curriculum document for this programme) would be assured.

Faculty should refer to that common list and should ensure that students also acquire outcomes in affective domain which are required for overall achievement of Programme Outcomes/Course Outcomes.

| S. No. | Unit    | Practical/Exercises  | Hrs.     |
|--------|---------|--|----------|
| No.    |         | (Outcomes in Psychomotor Domain)                           | required |
| 1      | I       | Install & Test Network Interface Card.                     | 02       |
| 2      | III     | Prepare and Test Straight UTP Cable.                       | 02       |
| 3      | III     | Prepare and Test Cross UTP Cable.                          | 02       |
| 4      | I & III | Develop a small Network. (Hands on Training.)              | 04       |
| 5      | IV      | Install Windows 2003/Windows 2008 Network operating System | 02       |
| 6      | I       | Install & Configure File Server.                           | 02       |
| 7      | I       | Install & Configure Print Server                           | 02       |
| 8      | I       | Install & Configure Mail Server                            | 02       |
| 9      | I       | Install & Configure Proxy Server                           | 02       |
| 10     | I       | Install & Configure Web Server                             | 02       |
| 11     | I       | Install & Test Router, Repeater and Bridge.                | 02       |
| 12     | IV      | Install a small wireless network using access points.      | 02       |
| 13     | V       | Set, Configure & Test Internet.                            | 02       |
|        | •       | Total  | 28       |

#### 8. SUGGESTED LIST OF STUDENT ACTIVITIES

- i. Identify type of Network in your Institute.
- ii. Prepare a design of Network in your Institute
- iii. Visit your Institute server room and various places where Racks and servers installed, identify various Network components, collect information about installation of necessary hardware and software.
- iv. Visit any ISP in your area.
- v. Prepare Charts of Network Topologies.
- vi. Seminar presentations.

#### 9. SPECIAL INSTRUCTIONAL STRATEGIES (if any)

Students should be exposed to layout of local area network installation in the institute and its technology and give an environment to establish, configure and trouble shoot a small network by giving hands on practice.

#### 10. SUGGESTED LEARNING RESOURCES

#### A) List of Books

| S.No. | Title of Book     | Author             | Publication   |
|-------|-------------------|--------------------|---------------|
| 1.    | Computer Networks | Andrew S Tannebaum | Pearson, 2012 |

|    |   | & David J Wetherall            |                               |
|----|---|--------------------------------|-------------------------------|
| 2. | Information Technology Today                      | S. Jaiswal                     | Galgotia Publications         |
| 3. | Computer Networks                                 | Bhushan Trivedi                | Oxford University Press, 2013 |
| 4. | Data Communication & Networking,                  | Forouzen                       | Tata McGraw Hill              |
| 5. | Data & Computer Communication,                    | Williams Stallings             | Prentice Hall of India        |
| 6. | Networks for Computer<br>Scientists and Engineers | Youlu Zheng & Shakil<br>Akhtar | Oxford University Press, 2012 |

#### B) List of Software/Learning Websites

- i. http://nptel.iitm.ac.in/courses.php?disciplineId=106
- ii. http://www.edrawsoft.com
- iii. Network Simulator Tool: GNS3 v0.8.5, NetSimK

#### C) List of Major Equipment/ Instrument with Broad Specifications

- i. Computer systems
- ii. Network Cable Cat 5/Cat 6.
- iii. Crimping Tool
- iv. UTP Cable Tester
- v. Layer 2 Switch
- vi. Wireless Access point and Wireless router
- vii. Impacting Tool
- viii. Network cable connectors
- ix. Network Trainer Kit

#### 11. COURSE CURRICULUM DEVELOPMENT COMMITTEE

#### **Faculty Members from Polytechnics**

- Prof. K. N. Raval, H.O.D Computer Department, R. C. Technical Institute Ahmedabad,
- **Prof. Manisha P Mehta**, Sr. Lecturer in Computer Technology, K. D. Polytechnic, Patan
- **Prof. Sunil R. Solanki,** Lecturer in Computer Engineering, Govt. Polytechnic Dahod.
- Prof. Sachin D. Shah, Lecturer in Computer Engineering, R. C. Technical Institute, Ahmedabad.

#### **Coordinator and Faculty Members from NITTTR Bhopal**

- **Dr. R. K. Kapoor**, Associate Professor Dept. of Computer Engineering and Applications, NITTTR, Bhopal
- **Dr. M. A. Rizvi**, Associate Professor Dept. of Computer Engineering and Applications, NITTTR, Bhopal.

#### GUJARAT TECHNOLOGICAL UNIVERSITY, AHMEDABAD, GUJARAT

# COURSE CURRICULUM COURSE TITLE: FUNDAMENTALS OF SOFTWARE DEVELOPMENT (Code: 3341603)

| Diploma Programmes in which this course is offered | Semester in which offered |
|--|---------------------------|
| Information Technology, Computer Engineering       | 4 <sup>th</sup> Semester  |

#### 1. RATIONALE

Software is the single most important technology on the world stage. Software's are used by almost all peoples for various purposes such as withdrawing payments from ATM machines, paying bills of electricity, telephone using ECS systems. Airline, railway tickets reservation online etc. People can work with computers flawlessly over a long period of time. One can also easily modify, upgrade the software without any problem or error. This course helps the students to develop, design, analyze, test & implement the software project during the courses in higher semesters of diploma programme.

#### 2. **COMPETENCY**

The course content should be taught and implemented with the aim to develop different types of skills so that students are able to acquire following competency:

Identify and analyze problems in the field of S/W development

#### 3. COURSE OUTCOMES:

The theory should be taught and practical should be carried out in such a manner that students are able to acquire different learning out comes in cognitive, psychomotor and affective domain to demonstrate following course outcomes.

- i. Explain Software and Software Engineering
- ii. Distinguish various Software Process Models (Approach of Software Development).
- iii. Analyze gather and prepare Software Requirement Specification for given project.
- iv. Draw use case diagrams for given modules and design user interface
- v. Apply code standard and Identify Software Testing Techniques.

#### 4. Teaching and Examination Scheme

| Teaching Scheme |            | Teaching Scheme Total Examination Scheme |                               |     |              |     |                | -              |
|-----------------|------------|--|-------------------------------|-----|--------------|-----|----------------|----------------|
| (               | (In Hours) |  | Credits Theory Mar<br>(L+T+P) |     | Theory Marks |     | ctical<br>ırks | Total<br>Marks |
| L               | Т          | P  | C                             | ESE | PA           | ESE | PA             | 150            |
| 3               | 0          | 2  | 5                             | 70  | 30           | 20  | 30             |                |

**Legends:** L-Lecture; T – Tutorial/Teacher Guided Theory Practice; P - Practical; C – Credit **ESE** - End Semester Examination; **PA** - Progressive Assessment.

|      | Total      | 42       | 20                           | 26    | 24    | 70    |

**Legends:** R = Remembrance; U = Understanding; A = Application and above levels (Revised Bloom's taxonomy)

**Note:** This specification table shall be treated as a general guideline for students and teachers. The actual distribution of marks in the question paper may vary slightly from above table.

#### 7. SUGGESTED LIST OF EXERCISES/PRACTICALS

The practical/exercises should be properly designed and implemented with an attempt to develop different types of skills (outcomes in psychomotor and affective domain) so that students are able to acquire the competencies/programme outcomes. Following is the list of practical exercises for guidance.

Note: Here only outcomes in psychomotor domain are listed as practical/exercises. However, if these practical/exercises are completed appropriately, they would also lead to development of certain outcomes in affective domain which would in turn lead to development of Course Outcomes related to affective domain. Thus over all development of Programme Outcomes (as given in a common list at the beginning of curriculum document for this programme) would be assured.

Faculty should refer to that common list and should ensure that students also acquire outcomes in affective domain which are required for overall achievement of Programme Outcomes/Course Outcomes.

| S. No. | Unit<br>No. | Practical Exercises (Outcomes' in Psychomotor Domain)               | Hrs. required |
|--------|-------------|---|---------------|
| 1      | I           | Identify the development model for software with proper explanation | 02            |
| 2      | II          | Gather requirement for software.                                    | 04            |
| 3      | II          | Prepare SRS Document for Software                                   | 04            |
| 4      | II          | Design Activity Diagram for system                                  | 02            |
| 5      | II          | Design Use-case Diagram for system                                  | 02            |
| 6      | II          | Design Data Dictionary of system                                    | 04            |
| 7      | II          | Prepare E-R Diagram of System                                       | 02            |
| 8      | II          | Design Data Flow Diagram of system                                  | 04            |
| 9      | III         | Prepare Gantt chart of system                                       | 02            |
| 10     | IV          | Prepare suitable test case for system testing.                      | 02            |
|        |             | Total   | 28            |

#### 8. SUGGESTED LIST OF STUDENT ACTIVITIES

Following is the list of proposed student activities like:

- i. Prepare charts for various models, SDLC life cycles, UML notations etc.
- ii. Prepare SRS documents based on case study.
- iii.Discuss various case studies available on internet.

#### 9. SPECIAL INSTRUCTIONAL STRATEGIES (if any)

Application for practical will be assigned to the students by the subject faculty and students will work in a group of 3-5

#### 10. SUGGESTED LEARNING RESOURCES

#### A) List of Books

| S.<br>No. | Title of Book  | Author                                     | Publication           |
|-----------|--|--|-----------------------|
| 1.        | Software Engineering: A<br>Practitioner's Approach           | Roger S. Pressman                          | Tata McGraw Hill,     |
| 2.        | Software Engineering   | Ian Somerville                             | Pearson education PHI |
| 3.        | Fundamentals of Software<br>Engineering                      | Rajib Mall                                 | PHI                   |
| 4.        | Structured System analysis and Design                        | Madhulika JAin                             | Bph Publication       |
| 5.        | Object Oriented Modeling and design with UML, second edition | Michael R Blaha<br>and James R<br>Rambaugh | Pearson Prentice Hall |

#### B) List of Major Equipment/ Instrument with Broad Specifications

Sufficient number of PCs are required according to number of students in the class for practicing development and maintenance of different software.

#### 11. COURSE CURRICULUM DEVELOPMENT COMMITTEE

#### **Faculty Members from Polytechnics**

- Prof. Sunil K. Paryani, Lecturer IT, Govt. Polytechnic, Ahmadabad
- Prof. Bhadresh G. Prajapati, Lecturer IT, Govt. Polytechnic, Himatnagar

#### **Coordinator and Faculty Members from NITTTR Bhopal**

- **Dr. Shailendra Singh**, HOD, Department of Computer Engineering and Application
- **Dr.K.J.Mathai**, Associate Professor, Department of Computer Engineering and Application

#### GUJARAT TECHNOLOGICAL UNIVERSITY, AHMEDABAD, GUJARAT

#### COURSE CURRICULUM COURSE TITLE: .NET PROGRAMMING (Code: 3340704)

| Diploma Programmes in which this course is offered | Semester in which offered |
|--|---------------------------|
| Computer Engineering                               | 4 <sup>th</sup> Semester  |

#### 1. RATIONALE

The .NET platform has evolved quickly to become a robust technology platform for enterprise application development and systems integration. It is a very popular platform these days being used to develop web sites/ web based applications. The students of Diploma in Computer Engineering should have skills in .NET Programming techniques using VB.NET. This course aims that student should learn creating simple applications as well as Applications that are database driven using .NET technology

#### 2. COMPETENCY

The course content should be taught and implemented with the aim to develop different types of skills so that students are able to acquire following competency:

#### • To design user interface, code, test and debug vb.net applications

#### 3. COURSE OUTCOMES

The theory should be taught and practical should be carried out in such a manner that students are able to acquire different learning out comes in cognitive, psychomotor and affective domain to demonstrate following course outcomes.

- i. Explain the architecture of Dot Net Technology.
- ii. Develop single form based .simple Net applications using basic and advanced control
- iii.Develop multiple form and menu based .Net applications
- iv. Develop small ADO.net based database driven . Net application
- v.Implement and trouble shoot simple .Net Applications

#### 4. TEACHING AND EXAMINATION SCHEME

| Tea | ching Scl | heme | Total              | <b>Examination Scheme</b> |    |                              |    |     |                |
|-----|-----------|------|--------------------|---------------------------|----|------------------------------|----|-----|----------------|

|      | domain)                  |  |  |  |  |  |  |
|      | 5c. Describe objects of  | 5.3 ADO .NET Object Model: Dataprovider(     |  |  |  |  |  |
|      | ado.net model            | connection, command, data reader, data       |  |  |  |  |  |
|      | 5e. Create ado.net       | adapter, datareaders) Dataset                |  |  |  |  |  |
|      | connection to SQL and    | (datatablecollection(datatable, datarows,    |  |  |  |  |  |
|      | other odbc servers to    | datacolumns, data constraints),              |  |  |  |  |  |
|      | view database data       | datarelationcollection)                      |  |  |  |  |  |
|      | 5f. Develop, test, debug | 5.4 ADO .NET Programming :Creating a         |  |  |  |  |  |
|      | small vb.net based       | Database Application, Creating Connection to |  |  |  |  |  |
|      | database applications    | a Database using ADO.NET, Populating Data    |  |  |  |  |  |
|      | _                        | in ADO.NET, Browsing Records, Datagrid       |  |  |  |  |  |
|      |                          | view, Editing, Saving, Adding and Deleting   |  |  |  |  |  |
|      |                          | Records using bounded and unbounded          |  |  |  |  |  |

#### 6. SUGGESTED SPECIFICATION TABLE WITH HOURS & MARKS (THEORY)

| Unit | Unit Title Teachin Distribution of Theory Mark      |         |       |              |       | y Marks |
|------|---|---------|-------|--------------|-------|---------|
| No.  |   | g Hours | R     | $\mathbf{U}$ | A     | Total   |
|      |   |         | Level | Level        | Level | Marks   |
| I    | Introduction to Microsoft .NET                      | 06      | 6     | 4            | 0     | 10      |
|      | framework and Basics of VB.Net                      | 00      | U     | ۲            | U     | 10      |
| II   | Introduction to Windows<br>Common Controls          | 08      | 4     | 4            | 6     | 14      |
| III  | Windows More controls and Menus                     | 12      | 4     | 8            | 8     | 20      |
| IV   | Advanced Features of VB.Net                         | 06      | 2     | 4            | 4     | 10      |
| V    | Inbuilt Functions and Database access using ADO.NET | 10      | 0     | 8            | 8     | 16      |
|      | Total   | 42      | 16    | 28           | 26    | 70      |

**Legends:** R = Remembrance; U = Understanding; A = Application and above levels (Revised Bloom's taxonomy)

**Note:** This specification table shall be treated as a general guideline for students and teachers. The actual distribution of marks in the question paper may vary slightly from above table.

#### 7. SUGGESTED LIST OF EXERCISES/PRACTICALS

The practical/exercises should be properly designed and implemented with an attempt to develop different types of skills (outcomes in psychomotor and affective domain) so that students are able to acquire the competencies/programme outcomes. Following is the list of practical exercises for guidance.

Note: Here only outcomes in psychomotor domain are listed as practical/exercises. However, if these practical/exercises are completed appropriately, they would also lead to development of certain outcomes in affective domain which would in turn lead to development of Course Outcomes related to affective domain. Thus over all development of Programme Outcomes (as given in a common list at the beginning of curriculum document for this programme) would be assured.

Faculty should refer to that common list and should ensure that students also acquire outcomes in affective domain which are required for overall achievement of Programme Outcomes/Course Outcomes.

| S. No.  | Unit | Practical Exercises  | Hrs.     |
|---------|------|--|----------|
| 5. 110. | No.  | (Outcomes' in Psychomotor Domain)                              | required |
| 1       | I    | Observe and draw visual .net IDE layout and hands on           | 01       |
| 1       | 1    | practice to create, save and open the project                  |          |
| 2       | I    | Write, test and debug at least 5 loop, array and operator      | 02       |
|         |      | based vb.net programs  |          |
| 3       | II   | Design forms and write, test and debug programs to test its    | 02       |
|         |      | various properties, methods, events                            |          |
| 4       | II   | Write, test and debug program to test input box and            | 01       |
|         |      | message box  |          |
| 5       | II   | Write, test and debug applications to use textbox, label,      | 06       |
|         |      | button   |          |
| 6       | II   | Write, test and debug applications to use radio button,        | 04       |
|         |      | checkbox, numeric updown and group box controls                |          |
| 7       | III  | Write, test and debug application using date time picker, list | 04       |
| ,       |      | box, combo box, picture box                                    |          |
| 8       | III  | Write, test and debug application using rich text box,         | 04       |
|         |      | progress bar, masked text box, link label                      |          |
| 9       | III  | Write, test and debug application using checked list box,      | 04       |
|         |      | scroll bars, timer   |          |
| 10      | III  | Write, test and debug applications using menu                  | 02       |
| 11      | IV   | Write, test and debug applications using dialog boxes          | 04       |
| 12      | IV   | Write, test and debug applications using sub procedures and    | 04       |
|         |      | functions  |          |
| 13      | IV   | Write, test and debug applications using MDI                   | 02       |
| 14      | V    | Write, test and debug applications using math and string       | 04       |
|         |      | manipulation functions   |          |
| 15      | V    | Draw ado.net object model                                      | 01       |
| 16      | V    | Create and test connection using ado.net to view SQL           | 02       |
| 10      |      | express server/Microsoft Access data in textbox etc controls   |          |
| 17      | V    | Create and test connection using ado.net Oracle/other          | 02       |
| - '     | V    | database data in textbox etc controls                          |          |
| 18      | V    | Create connection view controls like data-grid view            | 02       |
|         | 7    | controls   |          |
| 19      | V    | Write, test and debug small application to add, edit, search,  | 03       |
| 1/      | •    | delete record in database in bounded mode                      |          |
|         |      | Write, test and debug small application to add, edit, search,  | 06       |
| 20      | V    | delete record in database in unbounded mode i.e. through       |          |
|         |      | coding   |          |
|         |      | Total Hours  | 58       |

#### 7. SUGGESTED LIST OF STUDENT ACTIVITIES

Following is the list of proposed student activities like:

- i.Study available small VB. Net application on internet and reuse in your application
- ii.Develop VB.net related small applications
- iii. Present the application developed

#### 8. SPECIAL INSTRUCTIONAL STRATEGIES (if any)

The course activities include Lectures and Practical Exercises as per teaching scheme. The programmes in would be executed during practical's sessions. Following needs attention:

- i. Concepts will be introduced interactively in lectures using multimedia projector.
- ii.Students should be given sufficient hands on to develop sample web based applications using .NET technology under close guidance of Teachers.

#### 9. SUGGESTED LEARNING RESOURCES

#### A) List of Books

| S.<br>No. | Title of Book   | Author  | Publication                        |
|-----------|---|---|------------------------------------|
| 1.        | Visual Basic .net<br>Comprehensive Concepts and<br>Techniques | Shelly, cashman,<br>Quasney                   | Cengage learning, 2012             |
| 2.        | Visual Basic .net   | Steven Holzner                                | Dream Tech Press Latest<br>Edition |
| 3.        | Murach's Beginning Visual<br>Basic .NET                       | Anne Prince                                   | Murach                             |
| 4.        | Programming in Visual Basic. NET                              | Julia Case<br>Bradley, Anita C.<br>Millspaugh | MGH Latest edition                 |

#### B) List of Major Equipment/ Instrument with Broad Specifications

- i.Computer System with latest configuration and memory
- ii. Multimedia projector
- iii.Internet Access
- iv. Access to library resources

#### C) List of Software/Learning Websites

i. Software: Microsoft Visual Studio latest express edition

ii.http://www.homeandlearn.co.uk/NET/vbNet.html

iii.http://msdn.microsoft.com/en-us/beginner/default.aspx

#### 11. COURSE CURRICULUM DEVELOPMENT COMMITTEE

#### **Faculty Members from Polytechnics**

- Prof. R. M. Shaikh, H.O.D Computer Department, K. D. Polytechnic, Patan
- **Prof. K. N. Raval**, H.O.D Computer Department, R. C. Technical Institute, Ahmedabad
- **Prof. Manisha P Mehta**, Sr. Lecturer in Computer Technology, K. D. Polytechnic, Patan
- Prof. R. M. Shah, Sr. Lecturer in Computer Technology, Government Polytechnic, Ahmedabad

#### Coordinator and Faculty Members from NITTTR, Bhopal

- **Dr.Priyanka Tripathi,** Associate Professor, Dept. of Computer Engineering and Applications.
- **Dr. R. K. Kapoor**, Associate Professor, Dept. of Computer Engineering and Applications.

#### GUJARAT TECHNOLOGICAL UNIVERSITY, AHMEDABAD, GUJARAT

Course Code: 3340705

## COURSE CURRICULUM COURSE TITLE: COMPUTER ORGANIZATION AND ARCHITECTURE (Code: 3340705)

| Diploma Programmes in which this course is offered | Semester in which offered |
|--|---------------------------|
| Computer Engineering                               | 4 <sup>th</sup> Semester  |

#### 1. RATIONALE

This course provides detail of computer system's functional components, their characteristics, performance and interactions including system bus, different types of memory and input/output organization and CPU. This course also covers the architectural issues such as instruction set program and data types. On top that, the students are also introduced to the increasingly important area of parallel organization. This course also serves as a basic to develop hardware related projects. And hence it is an important course for all students of computer engineering branch.

#### 2. COMPETENCIES

The course content should be taught and implemented with the aim to develop different types of skills so that students are able to acquire following competencies:

- Apply computer architecture theory to solve the basic functional computer problem.
- Show and assemble basic computer components.

#### 3. COURSE OUTCOMES

The theory should be taught and practical should be carried out in such a manner that students are able to acquire different learning out comes in cognitive, psychomotor and affective domain to demonstrate following course outcomes.

- i. Describe the organization of a computer system in terms of its main components.
- ii. Identify various parts of a system memory hierarchy.
- iii. Interface digital circuits to microprocessor systems.
- iv. Relate design principles in instruction set design including RISC architectures.

#### 4. Teaching and Examination Scheme

|   | ching Sc<br>In Hour |   | Total<br>Credits<br>(L+T+P) | Theory Marks P |    | Examination Scheme Theory Marks Practical Marks |    | ctical | Total<br>Marks |

|-------------------------------------|--|--|
|                                     | modes used in computers.   |  |
|                                     | 3e. Explain data transfer and data manipulation instruction.   | 3.5 Data Transfer and manipulation:  |
|                                     | 3f. Discuss program control instructions.  | 3.6 Program Control  |
|                                     | 3g. Compare RISC and CISC Architecture.  | <ul><li>3.7 RISC</li><li>3.8 CISC Characteristics</li><li>3.9 RISC Characteristics</li></ul>             |
|                                     | 3h. Describe pipelining in CPU Design.   | 3.10 Parallel Processing   |
| Unit – IV<br>Memory<br>Organization | <ul><li>4a. Classify various types of<br/>Memory.</li><li>4b. Understand memory<br/>hierarchy and interleaving.</li></ul>        | <ul><li>4.1 Memory classifications</li><li>4.2 RAM,ROM,PROM,EPROM</li><li>4.3 Memory Hierarchy</li></ul> |
|                                     | <ul><li>4c. Discuss different types of main memory.</li><li>4d. Discuss different types of auxiliary memory.</li></ul>           | 4.4 Main Memory and<br>4.5 Auxiliary Memory  |
|                                     | 4e. Define Associative Memory.   | 4.6 Associative Memory   |
|                                     | <ul> <li>4f. Describe cache and virtual memory.</li> <li>4g. List advantages and disadvantages of using cache memory.</li> </ul> | 4.7 Cache Memory 4.8 Virtual memory  |
| Unit – V                            | 5a. Define I/O interface.  | 5.1 Input-Output Interface   |
| Input/output<br>Organization        | 5b. Explain methods of Asynchronous Data transfer.   | <ul><li>5.2 Asynchronous Data Transfer</li><li>5.3 Strobe Control</li><li>5.4 Handshaking</li></ul>      |
|                                     | 5c. Describe Asynchronous Serial Transfer.   | 5.5 Asynchronous Serial Transfer   |
|                                     | 5d. Name different modes of data transfer.   | 5.6 Modes of Data Transfer   |
| 0,                                  | 5e. Discuss Input Output processor and its organization.   | 5.7 Input-Output Processor (IOP)   |

Course Code: 3340705

#### 6. SUGGESTED SPECIFICATION TABLE WITH HOURS & MARKS (THEORY)

Course Code: 3340705

| Unit | Unit Title   | Teachin | Distribution of Theory Marks |       |       |       |
|------|--|---------|------------------------------|-------|-------|-------|
| No.  |  | g Hours | R                            | U     | A     | Total |
|      |  |         | Level                        | Level | Level | Marks |
| I    | Computer Architecture & Register Transfer and Micro-operations | 11      | 7                            | 10    | 0     | 17    |
| II   | Basic Computer Organization                                    | 6       | 2                            | 7     | 2     | 11    |
| III  | Central processor organization&<br>Pipeline processing         | 10      | 6                            | 8     | 2     | 16    |
| IV   | Memory Organization  | 8       | 5                            | 10    | 0     | 15    |
| V    | Input/output Organization                                      | 7       | 3                            | 8     | 0     | 11    |
|      | Total  | 42      | 23                           | 43    | 4     | 70    |

**Legends:** R = Remembrance; U = Understanding; A = Application and above levels (Revised Bloom's taxonomy)

**Note:** This specification table shall be treated as a general guideline for students and teachers. The actual distribution of marks in the question paper may vary slightly from above table.

#### 7. SUGGESTED LIST OF EXERCISES/PRACTICALS

There are no practical in this course and hence it is not applicable

#### 8. SUGGESTED LIST OF STUDENT ACTIVITIES

Group Seminars presentations (Group of max. 3 students) on different topics.

#### 9. SPECIAL INSTRUCTIONAL STRATEGIES (if any)

Teachers should organize tutorials to implement the curriculum effectively.

#### 10. SUGGESTED LEARNING RESOURCES

#### A) List of Books

| S.<br>No. | Title of Book             | Author           | Publication                 |
|-----------|---------------------------|------------------|-----------------------------|
|           | Computer system           | Mano ,M. Morris  | Pearson publication, Latest |
| 1.        | Architecture              |                  | Edition                     |
|           |                           |                  | ISBN: 978-81-317-0070-9     |
| 2.        | Computer Architecture and | Ghoshal, Subrata | Pearson publication, Latest |
| 2.        | Organization              |                  | Edition                     |
|           | Computer Architecture     | Parhami, Behrooz | Oxford publication, Latest  |
| 3.        |                           |                  | Edition                     |
|           |                           |                  | ISBN: 978-0-19-808407-5     |

#### B) List of Major Equipment/ Instrument with Broad Specifications

There are no practical in this course and hence equipment/instruments are not required as such.

#### C) List of Software/Learning Websites

- 1. http://www.ddegjust.ac.in/studymaterial/msc-cs/ms-07.pdf
- 2. <a href="http://www.iitg.ernet.in/asahu/cs222/Lects/">http://www.iitg.ernet.in/asahu/cs222/Lects/</a>

## COURSE CURRICULUM COURSE TITLE: WEB DEVELOPMENT TOOLS (Code: 3340706)

| Diploma Programmes in which this course is offered | Semester in which offered |
|--|---------------------------|
| Computer Engineering                               | 4 <sup>th</sup> Semester  |

#### 1. RATIONALE

The Internet has grown from the simple desire to a phenomenon which is leaving hardly any aspects of our daily lives untouched. For facilitating users, web sites carry many types of features. Today developing professional web sites includes a gamut of many kindsof technologies and tools involving GUI, animations, Content management, database, blogs etc. For designing and publishing web documents creating user interfaces, animation and informative reports are basic requirement of the software industry today. After completion of this course the student will be able to utilize these technologies and tools to create a professional website using scripting, blogging tool and a content-management system, database, animation tools.

#### 2. COMPETENCY

The course content should be taught and implemented with the aim to develop different types of skills so that students are able to acquire following competency:

• Create interactive website using various tools.

#### 3. COURSE OUTCOMES:

The theory should be taught and practical should be carried out in such a manner that students are able to acquire different learning out comes in cognitive, psychomotor and affective domain to demonstrate following course outcomes.

- i. Illustrate the basics of WWW (World Wide Web) and different Web Browsers.
- ii. Use Gmail account and Google Apps
- iii. Create wordpress based user interface and website
- iv. Create small scale animations

#### 4. TEACHING AND EXAMINATION SCHEME

| Teaching Scheme                         |   | Teaching Scheme Total Examination Scheme |   |     |                |     |    |     |
|---|---|--|---|-----|----------------|-----|----|-----|
| (In Hours) Credits Theory Marks (L+T+P) |   | Theory Marks Practica Marks              |   |     | Total<br>Marks |     |    |     |
| L                                       | Т | P  | C | ESE | PA             | ESE | PA | 100 |
| 0                                       | 0 | 4  | 4 | 0   | 0              | 40  | 60 |     |

## 5. COURSE DETAILS

| Unit  | <b>Major Learning Outcomes</b>   | Topics and Sub-topics  |
|---|--|--|
|   | (in cognitive domain)  |  |
| Unit – I<br>Web<br>Terminologies            | 1a. Define various web terminologies 1b. Describe use of client side and server side scripting | 1.1 Web Terminologies: web, web page, http, domain name, register and host a domain name, ISP 1.2 XML Technology: XML TREE, XML DTD 1.3 Client side scripting: definition, importance, examples: Javascript, AJAX, APPLET etc 1.4 Server Side Scripting: definition, importance, examples: CGI, Servlet, JSP, J2EE etc 1.5 Web services: definition, importance, examples      |
| Unit – II<br>Introduction<br>to Google apps | 2a. Operate Gmail account and it's functionality   | <ul><li>2.1 Creating mail account</li><li>2.2 Gmail compose and reply : streamlined compose pane, check your mail while typing, formatting</li></ul>   |
|   | 2b. Utilize various Google apps  | options appear only when you need them, new keyboard shortcuts, drag and drop addresses, drag and drop files, compose two messages at once, draft, create signatures, labels, filters, contacts (create groups and mailing lists, import contacts, contacts picker 2.3 Chat  |
|   |  | <ul> <li>2.4 Calendar ( scheduling and other calendar basics, set up reminders, sharing and more ),</li> <li>2.5 Working with Documents: Word, Excel, creating form</li> <li>2.6 Drive (Set up Google drive, (Organize, find, share files), open and preview files)</li> <li>2.7 Working with Groups</li> <li>2.8 Google printer</li> <li>2.9 Working with Drop box</li> </ul> |

| Unit                              | Major Learning Outcomes (in cognitive domain)                             | Topics and Sub-topics  |
|-----------------------------------|---|--|
| Unit – III Working with Wordpress | 3. Use Wordpress for creating Web pages including themes, posts and menus | 3.1 Introduction to wordpress: make a website or a blog using a wordpress, Downloading and Installing wordpress on XAMPP SERVER 3.2 All menus on the Administration Screen 3.3 Dashboard: website management functions of WordPress 3.4 Themes: Installing and handling themes, Editing the appearance of themes, theme configurations, adjusting different elements of installed themes like slideshow, post, pages 3.5 Posts: Adding new post, Modifying existing posts, placing images, videos to the posts, adding categories to publishing the posts on the websites 3.6 Pages: Adding New webpages, Modifying pages, Editing pages, Placing images, videos, mp3 to the pages, publishing the pages on the websites, creating static home pages. 3.7 Menus: Creating Custom Menus, modifying themes default menu. |

| Unit   | <b>Major Learning Outcomes</b>  | Topics and Sub-topics   |
|--|---|---|
|  | (in cognitive domain)   |   |
| Unit – IV Working with Wordpress                   | 4. Use Wordpress for Adding media, links and plugins to web pages                                       | <ul> <li>4.1 Media: Uploading pictures, videos, editing images, publishing them on the websites, embedding videos from Youtube to your website.</li> <li>4.2 Links: Adding New links, Editing the links, Adding categories to the links, Managing Categories</li> <li>4.3 Widgets: Adding, Editing widgets to the theme.</li> <li>4.4 Plugins: Introduction to plugins, Installing plugins , Editing plugins.</li> <li>4.5 Social Media Plugins: Floating social networking, social media widget, social media tabs, social media mashup, social networking icons</li> <li>4.6 Users: Managing the accessibility to the website/blog.</li> <li>4.7 Slider: Adding Custom Slider to the themes.</li> </ul> |
| Unit – V<br>Using Aliceto<br>create<br>animations. | 5. create an animation for telling a story, playing an interactive game, or a video to share on the web | <ul> <li>5.1 Code Editor , methods panel , control panel/tiles, scene editor,galleries</li> <li>5.2 Camera Navigation control: turn camera left/right, forward/backward, Move camera</li> <li>5.3 Creating first animation : open, save and run the project, add and position objects</li> <li>5.4 Example using Do in order, on together , Move up, down, forward, backward, right, left</li> <li>5.5 Examples using control structures</li> <li>5.6 Using memory variables</li> </ul>   |

| Unit | Major Learning Outcomes (in cognitive domain) | Topics and Sub-topics   |
|------|---|---|
|      |   | 5.7 Using user-define procedures 5.8 Add rotation and randomization: Examples of human objects walk, sit, run |
|      |   | <ul><li>5.9 Use keyboard controls</li><li>5.10Develop small animation</li></ul>                               |

#### 6. SUGGESTED SPECIFICATIONTABLE WITH HOURS&MARKS (THEORY)

Note: There is no end of the term exam in this course and hence this table is not applicable.

#### 7. SUGGESTED LIST OF EXERCISES/PRACTICALS

The practical/exercises should be properly designed and implemented with an attempt to develop different types of skills (outcomes in psychomotor and affective domain) so that students are able to acquire the competencies/programme outcomes. Following is the list of practical exercises for guidance.

Note: Here only outcomes in psychomotor domain are listed as practical/exercises. However, if these practical/exercises are completed appropriately, they would also lead to development of certain outcomes in affective domain which would in turn lead to development of Course Outcomes related to affective domain. Thus over all development of Programme Outcomes (as given in a common list at the beginning of curriculum document for this programme) would be assured.

Faculty should refer to that common list and should ensure that students also acquire outcomes in affective domain which are required for overall achievement of Programme Outcomes/Course Outcomes.

| S. No.                 | Unit | Practical Exercises  | Hrs.     |
|------------------------|------|--|----------|
| 5. 110.                | No.  | (Outcomes' in Psychomotor Domain)                            | required |
| 1                      | I    | Write various web terminologies.                             | 02       |
| 2.                     | 77   | Create one sample XML document using different XML           | 03       |
|                        |      | technologies.  |          |
|                        |      | Create Gmail Account and contacts. Test various mail         | 02       |
| 3                      | II   | utilities such as write mail, send mail, forward mail, reply |          |
| 9                      |      | mail, attach a file, creating signature, draft etc.          |          |
| 4                      | II   | Test advanced feature of gmail and Test calendar             | 02       |
| 4                      |      | functionality.   |          |
| 5 II Test Google docs. |      | Test Google docs. Test Google drives and printer.            | 02       |
| 6                      | II   | Create group, sharing information, sending messages to       | 02       |
| U                      | 11   | a group etc. Test DropBox.                                   |          |
| 7 `                    | III  | Download and install wordpressonXampp server.                | 02       |
| 8                      | III  | Work with administration menu and                            | 02       |
| 0                      | 111  | Dashboard: Logging in and looking around                     |          |
| 9                      | III  | Understand the different features themes and what a          | 02       |
| 9                      | III  | theme is.  |          |

|     |      | Installing themes.                                      |    |
|-----|------|---|----|
|     |      | Pick a theme that works for what you want to create.    |    |
|     |      | Switch your theme, if you change you mind.              |    |
|     |      | Make your theme beautiful on computers, phones, and     |    |
|     |      | tablets.  |    |
|     |      | Add personal touches to your blog, like as a custom     | 03 |
| 10  | III  | header or background.                                   |    |
| 10  | 1111 | Access more options to personalize your blog, such as   |    |
|     |      | unique fonts and colors.                                |    |
| 11  | III  | Add and configure widgets (and what widgets are).       | 02 |
|     |      | Create a post or a page.                                | 04 |
|     |      | Publish a post with text and images.                    |    |
| 12  | III  | Use different post formats depending on what you want   |    |
|     |      | to publish.   |    |
|     |      | Publish a page with text and images.                    |    |
| 13  | III  | Create a menu to help visitors navigate your pages and  | 02 |
| 13  | 1111 | posts.  |    |
| 14  | IV   | Install plugins and edit plugins.                       | 02 |
| 15  | IV   | Manage users to access your website                     | 02 |
| 16  | IV   | Add custom slider.                                      | 02 |
| 17  | V    | Install Alice and understand code editor, scene editor, | 03 |
| 1 / |      | methods panel, control panel and galleries.             |    |
| 18  | V    | Add and position objects and use camera navigation      | 02 |
| 10  | V    | control.  |    |
| 19  | V    | Write, code, debug and test simple programs on alice.   | 02 |
| 20  | V    | Write, code, debug and test control statement based     | 03 |
| 20  | v    | programs.   |    |
| 21  | V    | Write, code, debug and test animations using sub        | 04 |
| ∠1  | v    | procedures.   |    |
| 22  | V    | Develop and test small animation applications.          | 06 |
|     |      | Total   | 56 |

#### 8. SUGGESTED LIST OF STUDENT ACTIVITIES

Following is the list of proposed student activities like:

- i. Develop small website for some commercial or educational or personal purpose using tools covered in the course
- ii. Presentation of website developed

#### 9. SPECIAL INSTRUCTIONAL STRATEGIES (if any)

Students should be encouraged to give hands-on on each tool to create a professional looking web site under close guidance of teacher

#### 10. SUGGESTED LEARNING RESOURCES

#### A) List of Books

| Sr.<br>No. | Title of Book                               | Author                     | Publication  |
|------------|---|----------------------------|--|
| 1.         | Learning to Program with Alice, 3rd Edition | Dann, Cooper and<br>Pausch | Prentice Hall (Pearson<br>Education), ISBN 0-13-<br>212247-2, 2012 |

|   | Sams Teach Yourself WordPress 3 in 10 Minutes | Chuck Tomasi, Kreg<br>Steppe              | SAMS                    |
|---|---|---|-------------------------|
| 3 | . Web Technologies                            | Uttam Kumar Roy,<br>Debarshi Kumar Sanyal | Oxford University Press |
