Contributor Personality Development Program

SEMESTER VI

Type of course: Work-Personality Development

For Year: Pre-final year for all Diploma, Degree & Masters programmes over 2 semesters. For e.g. for Bachelors of Pharmacy and Engineering, the course will be conducted in Semesters V & VI.

Rationale: The Contributor Program aims to accomplish the following outcomes in the lives of students–

- Improve the employability of students by giving them the right work ethic and thinking that employers are looking for.
- Build their confidence with which they can go into any job and contribute meaningfully.
- Improve their ability to engage better in the workplace and to be able to handle the challenges that come up there.
- Build their career-worthiness and help them develop into future-ready contributors with ability to navigate a career in a volatile, changing world.
- Widen their choices of career and success, so that they are able to open up more opportunities for themselves and take up unconventional career pathways.
- Enable them to recognize how they, as technical professionals, can participate and make a positive contribution to their communities and to their state.

Towards this goal, the Contributor Program has been designed to awaken and strengthen students from within, in terms of building positive self-esteem, increasing their confidence level and I-can attitude, improving their aspirations, giving them new methods of thinking, building their cognitive capacities, exposing them to the skills and practices associated with being contributors in the workplace (not mere employees).

The Program content is also designed to expose students to real-world workplace scenarios and sensitize them to some of the challenges faced in society around them, especially in the local communities around them and in their own state of Gujarat.

The Contributor Program syllabus has been evolved and fine-tuned over several years, (a) to address the changing need and contemporary challenges being faced by industry and what employers of today are looking for in the people they hire and (b) by working extensively with universities and students building an appreciation of their challenges and concerns. At the core, the program is guided by the higher ideas and principles of practical Vedanta in work.

COURSE CONTENT :

Sr. No.	Content	Total Hrs
1	Finding Solutions The market environment in which organizations are operating, is becoming increasingly dynamic and uncertain. So, employers are increasingly seeking out people who can innovate and figure out solutions in the face of any challenge (unlike in the past when it was the	1.5 hrs Classroom engagement (including self-discovery/ solutioning sessions)

GUJARAT TECHNOLOGICAL UNIVERSITY

Bachelor of Engineering

Subject code: 3160002

	<p>people who were most efficient and productive, who were valued by organizations). At the heart of innovation lies this way of thinking of “finding solutions” rather than “seeing problems or roadblocks”.</p> <p>Students learn how to build this way of thinking, in this topic.</p>	
2	<p>Creating Value</p> <p>Companies are also looking for employees who do not just work hard, or work efficiently or productively - but those who will make a valuable difference to the fortunes of the company. This difference may come from innovation, but it may also come from focusing on the right things and identifying what really matters – both to the company and to the customers. In this topic, students learn how to build this capability.</p>	Same as above
3	<p>Engaging deeply</p> <p>The environment we live in is becoming increasingly complex because more and more things are getting interconnected, new fields are emerging, technologies are rapidly changing, capabilities and knowledge one is trained in will become fast obsolete. In such a scenario, the student’s ability to quickly understand and master what is going on, dive deep, get involved in any area, rapidly learn new capabilities that a job demands, is important. Engaging deeply is a core way of thinking that can help them in this. In this topic, students learn how to engage deeply.</p>	Same as above
4	<p>Enlightened self-interest & collaboration at work</p> <p>The changing nature of work in organizations and in the global environment is increasingly demanding that people work more collaboratively towards shared goals and more sustainable goals. A key to working successfully when multiple stakeholders are involved is “thinking in enlightened self-interest”. In this topic, students learn how to develop this way of thinking (going beyond “narrow self-interest”).</p>	Same as above
5	<p>Human-centered thinking & Empathy</p> <p>In this topic, students explore a human-centric approach to work – where the ability to recognize and respond to other people (whether they are users or customers or team members) as a human being with human needs and difficulties, is essential. This is at the heart of user-centric design of products and solutions, at the heart of genuine customer-centricity in services, and of any successful interaction with other people.</p>	Same as above
6	<p>Trust Conduct</p> <p>The biggest currency in a sustainable career is “trust” i.e. being trusted by team members, bosses, and customers. When we are trusted, people listen to us, they are willing to give us the chance to grow, give us the space to make mistakes, and work seamlessly with each other without always having to “prove ourselves”. In this topic, students learn how to demonstrate conduct that builds the trust of people.</p>	Same as above

15. Responsibility at work: how leading professionals act (or don't act) responsibly, Howard Gardner; John Wiley & Sons, 2007

GUJARAT TECHNOLOGICAL UNIVERSITY

Bachelor of Engineering

Subject code: 3160002

Course Outcomes:

Sr. No.	CO statement	Marks % weightage
Outcome of theory sessions		
CO-1	Students will be able to recognize & appreciate the thinking required to find solutions in the face of any challenge.	10-12%
CO-2	Students will be able to recognize & appreciate different types of value that can be created and the different ways to create value for others.	10-12%
CO-3	Students will be able to recognize & appreciate how to engage deeply, and its need, value, payoffs and consequences in different contexts.	10-12%
CO-4	Students will be able to differentiate between 'enlightened self-interest' and 'narrow self-interest' & appreciate the payoffs/ consequences of both when working with multiple stakeholders.	10-12%
CO-5	Students will be able to recognize & appreciate the human side of situations or interactions or projects that will help them develop a more human-centric approach/ response to work.	10-12%
CO-6	Students will be able to recognize & appreciate conduct which builds trust of people in contrast to conduct which breaks trust of people - in teams / organization & the value of trust conduct in various situations.	10-12%
Outcome of practical sessions		
CO-7	Students complete their 'Contributor Showcase Profile' on the Showcase Platform. This includes (a) completing Illumine's Contributor Mindset Assessment (b) building evidence to demonstrate their functional orientations as contributors.	15%
CO-8	Students learn to apply contributor thinking to think-through and address real-world challenges.	15%

INTEGRATED PERSONALITY DEVELOPMENT COURSE

SEMESTER VI

TYPE OF COURSE –

- Value-based holistic personality development course for university students.

RATIONALE -

- This course aims to help a person understand and know his / her purpose in life, get a positive thought pattern, gain confidence, improve behaviour, learn better communication and develop a healthy physique with morality and ethics in its core.
- Today's youth lack the guidance to face insecurity about their health and career, premature relationships and family breakdown, addictions and substance abuse, negative impact of internet and social media etc. This course includes such topics that will cover all aspects and provide solution to the current challenges through creative and interactive activities.
- This course will allow students to enjoy, understand and practice invaluable lessons preparing them for a successful future.

COURSE OUTCOMES –

- To provide students with a holistic education – focused on increasing their intelligence quotient, physical quotient, emotional quotient and spiritual quotient.
- To provide students with hard and soft skills, making them more marketable when entering the workforce.
- To educate students on their social responsibilities as citizens of India and have a greater sense of social responsibility.
- To provide students with a value-based education which will enable them to be successful in their family, professional, and social relationships by improving their moral and ethical values.
- To teach self-analysis and self-improvement exercises to enhance the potential of the participants.
- To have a broader sense of self-confidence and a defined identity.

THEORY OF COMPUTATION

6th SEMESTER

Type of course: NA

Prerequisite: Calculus, Data Structures and Algorithms, Set Theory

Rationale: Theory of computation teaches how efficiently problems can be solved on a model of computation. The main thrust is to identify the limitations of the computers through formalizing computation (by introducing several models including Turing Machines) and applying mathematical techniques to the formal models obtained. It is also necessary to learn the ways in which computer can be made to think. Finite state machines can help in natural language processing which is an emerging area.

Teaching and Examination Scheme:

Semester – VI

Subject Name: Advance java Programming

Type of course: Elective

Prerequisite: Java Programming

Rationale: Web application based on Java uses Servlet, JSP, JSF. To store the data database connectivity and database JDBC component is needed. Networking components are needed to transfer data over network. Model-View-Controller (MVC) architecture gives flexibility and makes the web applications loosely coupled.

Teaching and Examination Scheme:

- 12) JSF2.0 CookBook, Anghel Leonard, PACKT publication
- 13) Advanced Java, M. T. Savaliya, dreamtech

List of Practical:

1. Implement TCP Server for transferring files using Socket and ServerSocket.
2. Implement cookies to store firstname and lastname using Java server pages.
3. Implement the shopping cart for users for the online shopping. Apply the concept of session.
4. Implement student registration form with enrollment number, first name, last name, semester, contact number. Store the details in database. Also implement search, delete and modify facility for student records.
5. Write a Servlet program to print system date and time.
6. Design a web page that takes the Username from user and if it is a valid username prints “Welcome Username”. Use JSF to implement.
7. Write Hibernate application to store customer records and retrieve the customer record including name, contact number, address.
8. Write an application to keep record and retrieve record of student. The record includes student id, enrollment number, semester, SPI. Use MVC architecture.

WEB Programming

6th SEMESTER

Type of course: Professional Elective

Prerequisite: Programming, TCP/IP protocols and client-server development

Rationale: Today's world is driven by Internet based applications. The rationale behind this course is to impart the knowledge of web programming among students of computer engineering. This course covers web programming for both client-side and server-side to develop complete web based applications for various requirements

Teaching and Examination Scheme:

Teaching Scheme			Credits C	Examination Marks				Total Marks
L	T	P		Theory Marks		Practical Marks		
				ESE (E)	PA (M)	ESE (V)	PA (I)	
3	0	2	4	70	30	30	20	150

Content:

Sr. No.	Content	Total Hrs	% Weightage
1	Introduction to WEB Basics of WWW, HTTP protocol, Client Server architecture, Introduction to web server installation and configuration	04	7%
	Web Design Concepts of effective web design, Web design issues including Browser, Bandwidth and Cache, Display resolution, Look and Feel of the Website, Page Layout and linking, User centric design, Sitemap, Planning and publishing website, Designing effective navigation	04	8%
2	Basics of HTML and CSS Structure of HTML page, HTML tags for data formatting, tables, links, images, meta tags, frames, html form tags, media, APIs, HTML5 tags and validation. Need for CSS, Syntax and structure, CSS rules for Backgrounds, Colors and properties, Manipulating texts, Fonts, borders and boxes, Margins, Padding Lists, CSS Positioning. Animations, Tool-Tips, Style images, Variables, Media Queries, Wildcard Selectors (*, ^ and \$) in CSS, Working with Gradients, Pseudo Class, Pseudo elements, basic of frameworks like Bootstrap	08	15%
3	Client Side Scripting using JavaScript Syntax of JavaScript, Execution of JavaScript, Internal, Embedded and External Javascript, JavaScript : variables, arrays, functions, conditions, loops, Pop up boxes, JavaScript objects and DOM, JavaScript inbuilt functions, JavaScript validations and Regular expressions, Event handling with JavaScript, Callbacks in Javascript, Function as arguments in JavaScript, Introduction to JSON	10	20%

Course Outcome

Sr. No.	CO statement	Marks % weightage
CO-1	Use the various HTML tags with appropriate styles to display the various types of contents effectively	20

GUJARAT TECHNOLOGICAL UNIVERSITY

Bachelor of Engineering

Subject Code: 3160713

CO-2	Develop the dynamic web pages using HTML, CSS and JavaScript applying web design principles to make pages effective.	30
CO-3	Develop the server side PHP scripts using various features for creating customized web services.	25
CO-4	Write the server side scripts for designing web based services with database connectivity.	10
CO-5	Develop a web application using advanced web programming features including AJAX and JQuery using concepts of Web API.	15

List of Experiments:

Practical list should be prepared based on the content of the subject with following guidelines in mind.

1. Entire syllabus should be covered.
2. Practical list should be designed with real life examples.
3. List should be prepared to cover individual concepts and integration of different concepts on real life problems.

List of e-Learning Resources:

1. HTML:

- a. <https://developer.mozilla.org/en-US/docs/Web/HTML>
- b. <https://www.w3schools.com/html/>
- c. <https://www.tutorialspoint.com/html/index.htm>

DATA MINING

6th SEMESTER

Type of course: Under graduate (Elective)

Prerequisite: NA

Rationale: NA

Teaching and Examination Scheme:

Teaching Scheme			Credits C	Examination Marks				Total Marks
L	T	P		Theory Marks		Practical Marks		
				ESE (E)	PA (M)	ESE (V)	PA (I)	
3	0	2	4	70	30	30	20	150

Content:

Sr. No.	Content	Total Hrs.	% Weightage
1	Introduction to data mining (DM): Motivation for Data Mining - Data Mining-Definition and Functionalities – Classification of DM Systems - DM task primitives - Integration of a Data Mining system with a Database or a Data Warehouse - Issues in DM – KDD Process	3	10
2	Data Pre-processing: Data summarization, data cleaning, data integration and transformation, data reduction, data discretization and concept hierarchy generation, feature extraction , feature transformation, feature selection, introduction to Dimensionality Reduction, CUR decomposition	4	15
3	Concept Description, Mining Frequent Patterns, Associations and Correlations: What is concept description? - Data Generalization and summarization-based characterization - Attribute relevance - class comparisons, Basic concept, efficient and scalable frequent item-set mining methods, mining various kind of association rules, from association mining to correlation analysis, Advanced Association Rule Techniques, Measuring the Quality of Rules.	10	20
4	Classification and Prediction: Classification vs. prediction, Issues regarding classification and prediction, Statistical-Based Algorithms, Distance-Based Algorithms, Decision Tree-Based Algorithms, Neural Network-Based Algorithms, Rule-Based Algorithms, Combining Techniques, accuracy and error measures, evaluation of the accuracy of a classifier or predictor. Neural Network Prediction methods: Linear and nonlinear regression, Logistic Regression Introduction of tools such as DB Miner / WEKA / DTREG DM Tools	10	20
5	Cluster Analysis: Clustering: Problem Definition, Clustering Overview, Evaluation of Clustering Algorithms, Partitioning Clustering -K-Means Algorithm, K-Means Additional issues, PAM Algorithm; Hierarchical Clustering – Agglomerative Methods and divisive methods, Basic Agglomerative	10	20

GUJARAT TECHNOLOGICAL UNIVERSITY

Bachelor of Engineering

Subject Code: 3160714

	Hierarchical Clustering, Strengths and Weakness; Outlier Detection, Clustering high dimensional data, clustering Graph and Network data.		
6	Web mining and other data mining: Web Mining: Introduction to Web Mining, Web content mining, Web usage mining, Web Structure mining, Web log structure and issues regarding web logs, Spatial Data Mining, Temporal Mining, And Multimedia Mining. Applications of Distributed and parallel Data Mining.	5	15

Suggested Specification table with Marks (Theory):

Distribution of Theory Marks					
R Level	U Level	A Level	N Level	E Level	C Level
10	20	15	15	5	5

Legends: R: Remembrance; U: Understanding; A: Application, N: Analyze and E: Evaluate C: Create and above Levels (Revised Bloom's Taxonomy)

Note: This specification table shall be treated as a general guideline for students and teachers. The actual distribution of marks in the question paper may vary slightly from above table.

Reference Books:

1. J. Han, M. Kamber, "Data Mining Concepts and Techniques", Morgan Kaufmann
2. M. Kantardzic, "Data mining: Concepts, models, methods and algorithms, John Wiley & Sons Inc.
3. M. Dunham, "Data Mining: Introductory and Advanced Topics", Pearson Education.
4. Ning Tan, Vipin Kumar, Michael Steinbach Pang, "Introduction to Data Mining", Pearson Education

Course Outcome: After learning the course the students will be able

Sr. No.	CO statement	Marks % weightage
CO-1	Perform the preprocessing of data and apply mining techniques on it.	20
CO-2	Identify the association rules, classification, and clusters in large data sets.	30
CO-3	Solve real world problems in business and scientific information using data mining.	20
CO-4	Use data analysis tools for scientific applications.	15
CO-5	Implement various supervised machine learning algorithms.	15

List of Experiments:

Laboratory work will be based on the above syllabus with minimum 10 experiments to be incorporated.

GUJARAT TECHNOLOGICAL UNIVERSITY

- 5) System Software by Santanu Chattopadhyay, Prentice-Hall India, 2007

Course Outcome:

After learning the course the students should be able to:

GUJARAT TECHNOLOGICAL UNIVERSITY

Bachelor of Engineering

Subject Code: 3160715

Sr. No.	CO statement	Marks % weightage
CO-1	Explain and classify different methodologies, concepts and approaches to System Software Programming.	15%
CO-2	Identify elements of language processors with various data structures used in development of one-pass and multi-pass assemblers.	25%
CO-3	Examine macro processor, its usage and compare various loading and linking schemes.	25%
CO-4	Build various system programs using language processor development tools such as YACC and Lex.	15%
CO-5	Design code optimization based solution for the given system problems by applying various techniques of compiler, interpreter and debugger.	20%

List of Experiments and Design based Problems (DP)/Open Ended Problem:

(Pl. Note: List of Experiments should be as per theory covered in the class, below mentioned practical are just for the reference purpose)

1. Write a program to implement the lexical analyzer.
2. Write a Lexical Analyzer (using lex utility for UNIX).
3. Write a program to left factor the given grammar.
4. Write a program to remove the Left Recursion from a given grammar.
5. Aim: Implement Recursive Descendent Parsing for the given Grammar.
 $E \rightarrow T + E / T$
 $T \rightarrow F * T / F$
 $F \rightarrow (E) / i$
6. Implement Predictive Parser for the given grammar.
 $E \rightarrow T + E / T$
 $T \rightarrow F * T / F$
 $F \rightarrow (E) / i$
7. Write a SAL program in text file and generate SYMTAB and LITTAB
8. Use macro features of C language
9. Write a program which generates Quadruple Table for the given postfix String
10. Write a C program to parse a given string using Predictive parsing for given grammar.
type \rightarrow simple | \uparrow id | array [simple] of type
simple \rightarrow integer | char | num dotdot num

Bachelor of Engineering

Subject Code: 3160716

IOT and Applications

6th SEMESTER

Type of course: Open Elective

Prerequisite: C Programming, Microprocessor, Networking

Rationale: Internet of Things plays an important role in connecting the things i.e. variety of devices through the Internet. The IoT has emerged as an cutting-edge technology with applications in manufacturing, healthcare, Agriculture, transport, mining, smart cities and many more. This subject covers the fundamentals of IoT with its architecture, protocols and Applications. It also covers the overview and programming of two widely used IoT platforms Arduino and Raspberry Pi.

Teaching and Examination Scheme:

Teaching Scheme			Credits	Examination Marks				Total Marks
L	T	P		Theory Marks		Practical Marks		
				ESE (E)	PA (M)	ESE (V)	PA (I)	
					PA	ESE		
2	0	2	3	70	30	30	20	150

Content:

Sr No	Course content	Total Hrs
1	Introduction to Internet of Things: Application areas of IoT, Characteristics of IoT, Things in IoT, IoT stack, Enabling technologies, IoT challenges, IoT levels, IoT and cyber physical system, IoT and WSN	04
2	Sensors, Microcontrollers, and Their Interfacing: Sensor interfacing, Types of sensors, Controlling sensors, Microcontrollers, ARM	04
3	Protocols for IoT : Messaging protocols, Transport protocols, IPv4, IPv6, URI	06
4	Cloud for IoT: IoT and cloud, Fog computing, Security in cloud, Case study	04
5	Application Building with IoT: Various application of IoT : Food, Healthcare, Lavatory maintenance, Water quality, Warehouse, Retail, Driver Assistance, Collision impact	04
6	Arduino and Raspberry Pi: Arduino : Architecture, Programming and Application Raspberry Pi : Architecture, Programming and Application	06
7	IoT Security: Various security issues and need, architecture, requirement, challenges and algorithms	02

GUJARAT TECHNOLOGICAL UNIVERSITY

Bachelor of Engineering

Subject Code: 3160716

Reference Books:

1. Internet of Things, Vasudevan, Nagrajan and Sundaram, Wiley India
2. IoT Fundamentals, David Hance et al, Cisco Press
3. 21 IoT Experiments, Yashavant Kanetkar, Shirang Korde, BPB
4. IoT Based Projects, Rajesh Singh et al, BPB
5. Internet of Things with ARDUINO and BOLT, Ashwin Pajankar, BPB
6. Star Expert IoT Specialist, STAR CERTIFICATION

Course Outcomes: Students should be able to

Sr. No.	CO statement	Weightage
CO-1	Demonstrate the architecture and functioning of IoT systems including the sensors and microcontrollers with their interfacing and software need considering application areas.	20
CO-2	Diagnose the various IoT protocols with detailing of their elements and overall functioning within IoT systems for efficient communication.	20
CO-3	Design an IoT system to take the benefit of the Clouds for computing and storage considering security issues.	20
CO-4	Leverage the benefits of IoT technologies for automating the various real-life challenges in various application areas.	20
CO-5	Develop the software components of IoT system using Arduino/Raspberry Pi Programming.	20

List of Practical:

Practical should be performed by students based on

- Using Arduino or Raspberry Pi boards and its software platforms

Bachelor of Engineering

Subject Code: 3161604

IMAGE PROCESSING

Semester-VI

Type of course: Professional Elective Course-II

Prerequisite:

1. Knowledge of Fourier transform
2. Probability theory
3. Good programming skills.

Rationale:

This course will provide students with more techniques in the digital image processing for image enhancement as well as restoration of noisy images. Emphasis is given more on implementation of various algorithms so that students will be able to develop their own algorithm. The techniques covered in the syllabus have wide applicability in any field which needs to handle the image data.

Teaching and Examination Scheme:

Teaching Scheme			Credits	Examination Marks				Total Marks
L	T	P		Theory Marks		Practical Marks		
			ESE (E)	PA (M)	PA (V)	PA (I)		
3	0	2	4	70	30	30	20	150

Content:

Sr No	Course Content	No of Hrs.	% Weight
1	<u>Digital image fundamentals:</u> Light and Electromagnetic spectrum, Components of Image processing system, Image formation and digitization concepts, Neighbors of pixel adjacency connectivity, regions and boundaries, Distance measures, Applications.	05	20
2	<u>Image Enhancements:</u> In spatial domain: Basic gray level transformations, Histogram processing, Using arithmetic/Logic operations, smoothing spatial filters, Sharpening spatial filters. In Frequency domain: Introduction to the Fourier transform and frequency domain concepts, smoothing frequency-domain filters, Sharpening frequency domain filters.	15	30
3	<u>Image Restoration:</u> Various noise models, image restoration using spatial domain filtering, image restoration using frequency domain filtering, Estimating the degradation function, Inverse filtering.	05	20
4	<u>Colour Image processing:</u> Colour fundamentals, Colour models, Colour transformation, Smoothing and Sharpening, Colour segmentation.	03	05
5	<u>Wavelet and Multi-resolution processing:</u> Image pyramids, Multi-resolution expansion, wavelet transform.	03	10
6	<u>Image compression:</u> Introduction, Image compression model, Error-free compression, Lossy compression.	03	05

GUJARAT TECHNOLOGICAL UNIVERSITY

Bachelor of Engineering

Subject Code: 3161604

7	Image segmentation: Detection of discontinuities, Edge linking and boundary detection, thresholding.	03	10
---	--	----	----

Suggested Specification table with Marks (Theory):

Distribution of Theory Marks				
R Level	U Level	A Level	N Level	E Level
20	20	15	10	05

Legends: R : Remembrance ; U = Understanding; A = Application; N= Analyze and E=Evaluation and above Levels (Revised Bloom's Taxonomy)

Note: This specification table shall be treated as a general guideline for students and teachers. The actual distribution of marks in the question paper may vary slightly from above table

Reference Books:

1. Digital Image Processing, Second Edition by Rafael C. Gonzalez and Richard E. Woods, Pearson Education
2. Digital Image Processing by Bhabatosh Chanda and Dwijesh Majumder, PHI
3. Fundamentals of Digital Image Processing by Anil K Jain, PHI
4. Digital Image Processing Using Matlab, Rafael C. Gonzalez and Richard E. Woods, Pearson Education

Course Outcomes: Students will be able to

Sr. No.	CO statement	Marks % weightage
CO-1	<u>Understand</u> the various digital image processing techniques in spatial/ frequency domain	45
CO-2	<u>Apply</u> various tools and techniques for digital image quality enhancement in spatial/frequency domain	35
CO-3	<u>Analyse</u> image to <u>evaluate</u> quality of the digital image	15
CO-4	<u>Design</u> real time application using digital image processing concepts	05

List of Experiments:

- Experiments will be based on the topics taught in the theory.

Major Equipment:

1. Computer system with high computing power and main memory.

List of Open Source Software/learning website:

1. MATLAB with image processing toolbox.
2. Scilab (SIP)

Open ended problems:

GUJARAT TECHNOLOGICAL UNIVERSITY

Bachelor of Engineering

Subject Code: 3161604

1. Enhance the given degraded image (pick up any suitable degraded image which contains letters also) such that we may be able to read the letter properly. Try to get best possible quality of image.
2. Identify type of the noise present in the image using frequency as well as in spatial domain concepts and judge the basic behavioral characteristics of the various noises.
3. Capture the real time binary photo and apply the various segmentation algorithms to identify the various objects presents in the image (i.e road, trees, river etc.)
4. Assign face recognition problem.

GTUQuestionPapers.com

GUJARAT TECHNOLOGICAL UNIVERSITY

Bachelor of Engineering

Subject Code: 3161606

Semester – VI

Subject Name: Cryptography and Network security

Type of course: core

Prerequisite: Mathematical concepts: Random numbers, Number theory, finite fields

Rationale: The use of the Internet for various purpose including social, business, communication and other day to day activities has been in common place. The information exchanged through Internet plays vital role for their owners and the security of such information/data is of prime importance. Knowing the concepts, principles and mechanisms for providing security to the information/data is very important for the students of Computer Engineering/Information technology. The subject covers various important topics concern to information security like symmetric and asymmetric cryptography, hashing, message and user authentication, digital signatures, key distribution and overview of the malware technologies. The subject also covers the applications of all of these in real life applications.

Teaching and Examination Scheme:

Teaching Scheme			Credits C	Examination Marks				Total Marks
L	T	P		Theory Marks		Practical Marks		
				ESE (E)	PA (M)	ESE (V)	PA (I)	
3	0	2	4	70	30	30	20	150

Content:

Sr. No.	Content	Total HRS	% Weightage
1	Introduction – Security services, security services, security mechanisms Finite fields – group, ring, fields, modular arithmetic, The Euclidean algorithm.	5	15%
1	Symmetric Cipher Model, Cryptography, Cryptanalysis and Attacks; Substitution and Transposition techniques	3	5%
2	Stream ciphers and block ciphers, Block Cipher structure, Data Encryption standard (DES) with example, strength of DES, Design principles of block cipher, AES with structure, its transformation functions, key expansion, example and implementation	5	10%
3	Multiple encryption and triple DES, Electronic Code Book, Cipher Block Chaining Mode, Cipher Feedback mode, Output Feedback mode, Counter mode	4	5%

GUJARAT TECHNOLOGICAL UNIVERSITY

Bachelor of Engineering Subject Code: 3161609

4	Public Key Cryptosystems with Applications, Requirements and Cryptanalysis, RSA algorithm, its computational aspects and security, Diffie-Hillman Key Exchange algorithm, Man-in-Middle attack	7	15%
5	Cryptographic Hash Functions, their applications, Simple hash functions, its requirements and security, Hash functions based on Cipher Block Chaining, Secure Hash Algorithm (SHA)	4	10%
6	Message Authentication Codes, its requirements and security, MACs based on Hash Functions, Macs based on Block Ciphers	3	10%
7	Digital Signature, its properties, requirements and security, various digital signature schemes (Elgamal and Schnorr), NIST digital Signature algorithm	4	8%
8	Key management and distribution, symmetric key distribution using symmetric and asymmetric encryptions, distribution of public keys, X.509 certificates, Public key infrastructure	4	7%
9	Remote user authentication with symmetric and asymmetric encryption, Kerberos	4	5%
10	Web Security threats and approaches, SSL architecture and protocol, Transport layer security, HTTPS and SSH	5	10%

Suggested Specification table with Marks (Theory): (For BE only)

Distribution of Theory Marks

1	Math, probability and statistical modeling Exploring probability and inferential statistics, quantifying correlation, Reducing Data Dimensionality with linear algebra, Modeling Decisions with Multi Criteria Decision making, Regression Methods, Detecting outliers, Time-series analysis	05	20
2	Using Clustering to subdivide data Introducing clustering basics, identifying clusters, Categorizing data with Random forest algorithm	03	15
3	Modeling instances Recognizing the Difference between Clustering and Classification, Making sense of data with nearest neighbor analysis, classifying data with average nearest neighbor algorithms, classifying data with K- nearest neighbor algorithms, Solving Real-world problems	06	15
4	Principles of Data Visualization Design Data visualization: The big three, Designing to meet the needs, Picking the most appropriate Design style, Choosing how to add context, Selecting the appropriate Data Graphic Type, Choosing a Data Graphic, Using D3.js for Data Visualization.	05	20
5	Web based applications for visualization design, Exploring best practices in Dashboard Design, Making maps from spatial data	06	20

GUJARAT TECHNOLOGICAL UNIVERSITY

Bachelor of Engineering

Subject Code: 3161613

6	Data science for driving growth in E-commerce	03	10
---	---	----	----

Suggested Specification table with Marks (Theory): (For BE only)

Distribution of Theory Marks					
R Level	U Level	A Level	N Level	E Level	C Level
10	40	20	--	--	--

Legends: R: Remembrance; U: Understanding; A: Application, N: Analyze and E: Evaluate C: Create and above Levels (Revised Bloom's Taxonomy)

Course Outcomes: Students will be able to

Sr. No.	CO statement	Marks % weightage
CO-1	Perform descriptive statistics and dimensionality reduction.	20
CO-2	Perform clustering and detect outliers	30
CO-3	Perform data visualization	40
CO-4	Apply the analytics and visualization to real world problems.	10

Books

- 1) Data science for Dummies by Lillian Pierson WILEY publication
- 2) Doing Data Science by Cathy O'Neil, Rachel Schutt, O'Reilly Media, Inc.
- 3) **Data Analytics for Beginners: Basic Guide to Master Data Analytics Paperback –by Paul Kinley**

List of Open Source Software/learning website:

- 1) <https://www.analyticsvidhya.com/>

List of Practical:

1. Prepare synthetic data set for student data, consisting of Enrollment number, name, gender, semester wise, subject wise marks, difficulty level of the subject, SPI(Semester Index), address with geographical location.
 - a.
 - (i) Write a program to find correlation between gender and Semester marks.
 - (ii) Write a program to find correlation between geographical location and semester marks. Analyze which two are highly correlated.
 - b. Write a program to calculate correlation between difficulty level and subject marks. The higher the difficulty level the marks should be less. The two should be negatively correlated. Analyze the correlation.

2. Consider the sample of 50 students. Gather the university exam score of the students across all semesters of Engineering for one college. Write a program to find out mean and standard deviation for this college. Now consider the sample of students of different colleges of Gujarat for university exam score. Write a program to find out mean and standard deviation. Write the observations.
3. Collect the month wise COVID cases data for cities – Ahmedabad, Vadodara, Rajkot, Surat. Plot this time series Data. Analyze the trend as per time.
4. There is a need to advice the 12th standard students that which college he/she should choose for engineering education. Decide the features to use for grading the engineering college. Prepare the data set. Write a program to apply random forest algorithm and suggest the best suited college for 12th standard students.
5. Consider the following data set.

Height (in cms)	Weight (in kgs)	The weightlifting category
158	58	M
158	59	M
158	63	M
160	59	M
160	60	M
163	60	M
163	61	M
160	64	L
163	64	L
165	61	L
165	62	L
165	65	L
168	62	L
168	63	L
168	66	L
170	63	L
170	64	L
170	68	L

GUJARAT TECHNOLOGICAL UNIVERSITY

Bachelor of Engineering
Subject Code: 3161613

Write a program for KNN algorithm to find out weight lifting category for height 161cm and weight 61kg.

6. Take the data of the students prepared in exercise 1. Visualize the data to show region wise results, branch wise results, subject wise results. Decide the visualization technique to show appropriate data.
bar chart, pie chart, maps, scatter plot
7. Use D3.js to show following.
 - (i) Take year wise population.
 - (ii) Show appropriate size circle for population as per year.
 - (iii) Fill color in circle.
 - (iv) Prepare bar chart and pie chart.
 - (v) Explore other functionality of D3.js
